Legitimate Sources vs. Scams

You will often see queries for an **apple gift card generator**. We must be clear: **gift card generators usually do not work** and are often designed to steal your data. Legitimate codes must be activated by a retailer. A generated code that hasn't been purchased or activated at a register is worthless.

Instead of risking your account security with a fake generator, focus on legitimate promotional events, giveaways, and verified platforms. Searching for lists of **unused itunes codes 2026** can sometimes yield results during special promotional periods, but always verify the source.
